

# NEW REPAIR & SYSTEM TEST CAPABILITY

## Allen Bradley PLC 2 System

### *Technical Bulletin*

The Allen Bradley PLC 2 system has been an industrial cornerstone for years. The K+S Services Kokomo facility is pleased to announce full diagnostic and repair service capability for this PLC system. All types and revisions of AB PLC2 system processors, racks, power supplies, communication and I/O modules can be repaired and fully system tested. Special diagnostic programs written by K+S will cycle each targeted module through various testing sequences to ensure a quality repair. Each item under test will be cycle tested for 2 to 3 days to reduce intermittent failures. Each module also has any components known to fail replaced with new ones as a preventive maintenance precaution.

**12 Month In-Service Warranty**

**All Units Are System Tested**

**No Charge Evaluation**
