

NEW REPAIR & SYSTEM TEST CAPABILITY

Moore Data Gage 873

Technical Bulletin

K+S Kokomo is pleased to announce their new repair capability for the Moore Data Gage 873 measuring system. The Data Gage 873 utilizes up to eight LVDT linear gage sensors for the calibrated measuring of machined part tolerances. In addition, this system has four analog signal inputs and an analog output for interfacing to other automation equipment. There is also an internal programming module that will store all the measuring programs. This system is used in many manufacturing applications where close tolerance measurement is required.

12 Month In-Service Warranty

All Units Are System Tested

No Charge Evaluation
