

NEW REPAIR & SYSTEM TEST CAPABILITY

Nadenco Welders

RWC , RWC-GT, IWC, and IRWC

Technical Bulletin

The completion of the Nadenco Resistive weld control test stand has 4 styles of weld controls in this line. Rwc, Rwc-GT styles are similar in construction as are the Iwc, and Irwc. These controls have weld timer controls which interface with the Robot control and are used with a resistive weld gun (big Clamp like jaw). Units in controls are as follows:

K-CSU-04 Rwc and Rwc-GT Controls

K-TUCO-O4R Timers

Iwc-I3070

IRWC WICO-C140

We test these units with a load bar simulated load, and a variety of schedules to verify amperage.

12 Month In-Service Warranty

All Units Are System Tested

No Charge Evaluation
